

## TECHNICAL DATA SHEET

# SAR-GEL® BLUE

## Water Finding Paste

### Description

SAR-GEL® BLUE water finding paste provides a fast, reliable way to detect water bottoms in storage tanks containing gasoline and gasoline/ethanol blends containing up to 15% ethanol.

It is also effective with diesel, jet fuel, fuel oil, biodiesel, and other water incompatible solvents. The orange paste turns blue on contact with water and works especially well in alcohol blend systems.

### SHELF LIFE

The typical shelf-life for this product is **12** months.

### STORAGE

See SDS for Storage Considerations.

### HEALTH AND SAFETY

See SDS for Health & Safety Considerations.

### LIQUID PROPERTIES

Appearance	Orange to blue paste
------------	----------------------

### SPECIAL FEATURES

Phenolphthalein-free

Water/alcohol indicating paste shows the presence of water bottoms in fuel storage tanks

Available in one-ounce tubes

Orange paste turns blue on contact with water
